

Magic You Can Do!

The Appearing Knot

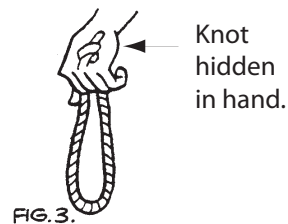

Effect:

A rope is shown (fig. 1), and dropped from your hand two or three times. Give the rope a short 'snap' with each drop. On the third drop, a knot appears at the end of the rope (fig. 3).

How it works!

The rope already has a knot in one end. You hide the knot in your hand (fig. 3). When you drop the rope the third time, drop the knotted end instead.
